Hiring Manager

Absa Bank Kenya

PO Box 30120 (00100)

Nairobi, Kenya

Dear Hiring Manager,

I am writing to express my interest in the Software Engineering Internship opportunity at Absa Bank. As a fourth-year Computer Science student at University of Nairobi, with a strong foundation in software development, database systems, and machine learning, I am excited about the chance to contribute to Absa's commitment to digital innovation in the financial sector.

Over the past year, I have led the development of an AI-powered Recognition of Prior Learning (RPL) platform using the MERN stack, integrated with AI models for document validation and skill extraction. This project sharpened my skills in backend development, React-based UI design, and integrating cloud-based AI services in a secure and scalable environment.

I am particularly drawn to Absa's focus on transformative banking through technology, and I am eager to be part of a team that applies software engineering to deliver real-world impact in financial services. I am a fast learner, proactive problem-solver, and passionate about building tools that make systems smarter and more efficient.

I would welcome the opportunity to contribute to Absa's projects while growing as a professional in a challenging, collaborative environment. Thank you for considering my application. I look forward to the possibility of discussing how I can support your team during the internship period.

Sincerely,

Yusuf Abdinoor
